## HOW TO USE this INDEX

- Get two scorecards with each opponent's DAILY HANDICAP on them
- Find the DIFFERENCE between the handicaps
- Look at either played $1^{\text {st }}$ or $10^{\text {TH }}$ TEE chart
- The chart shows the number of the hole that the player gives/receives shots
E.g. If two opponents have 3 shots difference in their daily handicaps and they're off the $10^{\text {th }}$ tee then the 3 shots are given on hole numbers 3,13 and 17
- These holes should be marked on both players' cards.
